EDUCATION

University of California, Santa Barbara

Santa Barbara, CA

B.S. Computer Science | GPA: 3.76

Expected June 2028

- **Coursework:** Data Structures and Algorithms, Computer Architecture, Probability & Statistics, Systems Programming

EXPERIENCE

Handshake AI Fellowship

Jan. 2026 – Present

AI Evaluation Fellow

Remote

- Completed 20+ rubric-based evaluations of AI-generated image edits, scoring realism and coherence to improve review consistency through structured written justifications across model-quality assessments.

PromptShop

Jan. 2026 – Present

Software / Prompt Engineering Contributor

Remote

- Designed and iterated 5 prompt-driven content workflows, validating outputs on 30+ structured test cases to improve output reliability and reduce manual post-processing across repeated content tasks.

PLAXCO Lab

Aug. 2025 – Present

Undergraduate Researcher

Santa Barbara, CA

- Processed 44 electrochemical datasets with Python, converting potentiostat outputs into concentration metrics and plots while refactoring SACMES into reusable analysis code for electrochemical biosensor experiments.

Techions | *Python, Roboflow, Depth Estimation, Segment Anything*

May 2024 – Aug. 2024

Technology Intern

San Jose, CA

- Built a computer vision pipeline to detect vegetation near cellular infrastructure, improving detection accuracy by 27% and strengthening vegetation-risk screening for wildfire prevention and network reliability.

PROJECTS

Molecular Property Prediction Platform | *Python, PyTorch Geometric, FastAPI, Docker, CI*

- Implemented and compared GCN and GIN models in PyTorch Geometric using scaffold-based splits; the promoted GCN achieved 1.3502 RMSE, 1.0385 MAE, and R^2 of 0.6441 on the test set.
- Built an end-to-end prediction workflow with uncertainty evaluation and model-promotion logic, then shipped FastAPI serving, Docker packaging, CI, and 142 tests.

Causal Uplift Experimentation Platform | *Python, scikit-learn, FastAPI, Docker, CI*

- Implemented S-, T-, and random-forest learners with cross-fitting, bootstrap uncertainty, sensitivity analysis, and policy simulation to estimate heterogeneous treatment effects.
- Built authenticated FastAPI staging infrastructure with audit logging, monitoring, Docker, CI, and 174 tests for reproducible experiment execution.

HDFS Log Anomaly Detection | *Python, scikit-learn, FastAPI, Docker, CI* | [GitHub](#)

Feb. 2026 – Present

- Parsed 11.2M HDFS log lines into 2,034 time windows with 205 engineered features, then compared Isolation Forest and One-Class SVM models for unsupervised anomaly scoring.
- Deployed a schema-validated FastAPI batch-scoring API for both models with `/health` monitoring and CI smoke tests to detect feature drift and serving failures.

LEADERSHIP

SciTrek

Aug. 2025 – Present

Mentor

Santa Barbara, CA

- Improved curriculum for a bioinformatics module used by 100+ K–12 students, translating technical concepts into accessible lessons for non-expert audiences in STEM outreach settings.

C.S.E.P. (F.U.S.E.)

Sep. 2025 – Present

Mentor

Santa Barbara, CA

- Selected as the program's only undergraduate mentor, helping develop and deliver a STEM outreach module across 9+ classrooms and 250+ students while translating technical concepts for younger learners.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, SQL

Frameworks/Libraries: PyTorch, PyTorch Geometric, FastAPI, scikit-learn, NumPy, pandas, Pydantic

Backend/MLOps: Docker, GitHub Actions, REST APIs, model serving, schema validation, logging, monitoring, joblib

Tools/Platforms: Git, Linux
